

ORDERING THE WORLD POPULATION PROSPECTS DATA ON CD-ROM

The *2008 Revision of the World Population Prospects*, prepared by the United Nations Population Division, provides a comprehensive and consistent set of population data for the world's countries and their aggregates.

The results of this Revision are available on two CD-ROM editions that differ with regard to the data included and their prices (table 1). All two CDs contain estimates and projections of national populations by five-year age group and sex for 1950-2050 and demographic indicators for the same period. Data for 1950-2010 are estimates and those thereafter are projections.

The Comprehensive CD-ROM contains for all fertility projection variants (low, medium, high and constant-fertility) all essential data such as total births, total deaths, total net-migration, the respective crude rates, life expectancy at birth by sex, infant and child mortality, summary measures of adult mortality and deaths by broad age groups, total fertility, net-reproduction rate and population growth rates for 1950-2050 by five-year periods. It includes population by five-year age group and sex for five-year periods and interpolated annual total population. In addition, this CD edition provides births and deaths by five-year age group, the corresponding age-specific fertility and mortality rates and abridged life tables (survivors and life expectancies at specific ages). It also comprises standard sets of demographic indicators and population by age group and sex for four other variants (instant-replacement-fertility, zero-migration, constant-mortality and no mortality and fertility change) and for two AIDS mortality scenarios. All data on this CD are presented in

Excel worksheets and correspond to the datasets 1 to 3 and 5 to 12 listed in table 1.

The Extended CD-ROM contains all the data from the Comprehensive CD, plus population figures by single calendar year and single age group for 1950-2050. This CD also provides interpolated demographic indicators for single calendar years (total births and deaths, their respective crude rates, life expectancy at birth by sex, infant and child mortality, survivors to age 1, total fertility, etc.), urban population, population density and interpolated total population by broad age group and sex, and their respective percentage distributions and sex ratios. The data are presented in Excel and database formats (ASCII comma delimited format for all datasets) and correspond to all datasets listed in table 1.

All CDs show data for 230 countries and areas, 33 country aggregates, including the world as a whole, the more and the less developed regions, and the major areas. For the AIDS scenarios (datasets 11-12), special aggregations by region and HIV prevalence level in 2007 are provided for 58 countries affected by the HIV/AIDS epidemic. The Microsoft Excel files correspond to version 97/2003 and later of this software. For a detailed listing of the contents of each CD, see table 2. Data files in database formats are shown in table 3. All CDs include the English Executive Summary and Highlights of *World Population Prospects: The 2008 Revision* in Adobe Acrobat PDF format.

For information on how to order this CD-ROM please see the order form at the end.

Table 1. Summary contents of each CD-ROM

Description: Datasets included on CD-ROM	Comprehensive CD	Extended CD
0. Location list and meta-information about latest data sources used	Excel format	Excel and database formats
1. Period indicators, five-year periods	Excel format	Excel and database formats
2. Stock indicators, five-year periods (and annual population)	Excel format	Excel and database formats
3. Population by five-year age group and sex, five-year periods	Excel format	Excel and database formats
4. Population by five-year age group and sex, annual		Excel and database formats
5. Mortality indicators by age and sex, five-year periods	Excel format	Excel and database formats
6. Fertility indicators by age, five-year periods	Excel format	Excel and database formats
7. Instant-replacement-fertility variant	Excel format	Excel and database formats
8. Zero-migration variant	Excel format	Excel and database formats
9. Constant-mortality variant	Excel format	Excel and database formats
10. No change variant (constant-mortality and constant-fertility)	Excel format	Excel and database formats
11. No-AIDS mortality scenario	Excel format	Excel and database formats
12. AIDS mortality scenario (medium)	Excel format	Excel and database formats
13. Interpolated demographic and population indicators, annual		Excel and database formats
14. Population (by sex and both sexes combined) interpolated by single years of age and single calendar years		Excel and database formats
Price (\$US)	\$250	\$800

TABLE 2. CONTENTS OF DATASETS IN DIGITAL FORM

Dataset and File	Indicators	CD-ROM Edition ¹	Number of countries or areas	Projection variants or scenarios (starting in 2010)	Periods covered	Age groups
F0.1	Location list with codes (numerical and ISO3), description, major area, region and development group; countries with explicit HIV/AIDS mortality modelling in WPP 2008 revision, HIV prevalence rate (%) in population aged 15-49 years in 2007 (UNAIDS, 2008) and by prevalence group, peak of HIV epidemic (year and value for maximum prevalence between 1980-2007), comparison for 2005 HIV prevalence rate between UNAIDS 2006 and 2008 revisions.	C/E	230	---	---	---
F0.2	Latest data sources used to derive estimates for total population, fertility, mortality and migrations by countries or areas (also available at http://esa.un.org/wpp/sources/country.aspx)	C/E	230	---	---	---

					1995, 1996,...2050	0, 1, 2,... 79, 80+, 81... 99, 100+

Note: (1) CD-ROM editions are: C = Comprehensive, E = Extended

Datasets 11 to 12 present, in addition to the default AIDS mortality scenario (medium), three other AIDS scenarios for 58 countries affected by the HIV/AIDS epidemic: the No-AIDS scenario applies the mortality likely to be exhibited by the non-infected population to the whole population, thus excluding the direct impacts of the epidemic. The estimates associated with the No-AIDS scenario (that is, the figures for 1980-2010) differ from the estimates of the other variants because AIDS started affecting the populations in the majority of the highly-affected countries around 1980. By comparing these results with those of the estimates and medium variant that include explicitly the effects of the HIV/AIDS epidemic, the user can infer the impact of the epidemic.

TABLE 3. DATA FILES IN DATABASE FORMAT INCLUDED IN THE EXTENDED CD-ROM EDITION

Topic / Data file	Description	Data file format ¹	Number of indicators ²	Number of records
WPP2008_Locations.csv	Location list with codes (numerical and ISO3), description, major area, region and development group; countries with explicit HIV/AIDS mortality modelling in WPP 2008 revision, HIV prevalence rate (%) in population aged 15-49 years in 2007 (UNAIDS, 2008) and by prevalence group, peak of HIV epidemic (year and value for maximum prevalence between 1980-2007), comparison for 2005 HIV prevalence rate between UNAIDS 2006 and 2008 revisions.	CSV	18	278
WPP2008_Sources.csv	Latest data sources used to derive estimates for total population, fertility, mortality and migrations by countries or areas (also available at http://esa.un.org/wpp/sources/country.aspx)	CSV	--	230
DB01. Period indicators				
WPP2008_DB01_Period_Indicators.csv	All period indicators (total fertility, net reproduction rate, crude birth rate, births, mean age of childbearing, life expectancy at birth (by sex), infant mortality rate, under-five mortality, crude death rate, total number of deaths (by sex) and by broad age group, percentage total deaths by broad age group and by sex, probability of dying between birth and the age of 40 or 60 years (by sex), adult probability of dying between age 15 and 50 or 60 (by sex), life expectancy at age 15, 60 and 80 (by sex), net migration rate, net number of migrants, average annual rate of population change, rate of natural increase, sex ratio at birth) by major area, region and country, for estimates and all 9 projection variants or scenarios, 1950-2050. Data only for 1980-2050 for AIDS scenarios.	CSV	46	>48,170
DB02. Stock indicators				
WPP2008_DB02_Populations_Annual.csv	Total population (by sex and both sexes combined), average annual rate of population change, and population density by major area, region and country, for estimates and all 9 projection variants or scenarios, annually for 1950-2050. Data only for 1980-2050 for AIDS scenarios.	CSV	5	>240,000
WPP2008_DB02_Populations_Broad_Age_Groups.csv	Total population by broad age group (by sex and both sexes combined) by major area, region and country, for estimates and all 9 projection variants or scenarios, 1950-2050. Data only for 1980-2050 for AIDS scenarios.	CSV	72	>45,000
WPP2008_DB02_Stock_Indicators.csv	All stock indicators (total population by sex, dependency ratios (total, child, old-age) for different age groups, median age, population density, percentage by broad age group and by sex, sex ratio (M/F) and femininity ratio (F/M) by broad age group), by major area, region and country, for estimates and all 9 projection variants or scenarios, 1950-2050. Data only for 1980-2050 for AIDS scenarios.	CSV	137	>50,000
DB03. Population by age and sex, five-year periods				
Population by age group and sex, by major area, region and country, for estimates and all 11 projection variants or scenarios, 1950-2050. Data only for 1980-2050 for AIDS scenarios.				

TABLE 3. DATA FILES IN DATABASE FORMAT INCLUDED IN THE EXTENDED CD-ROM EDITION

Topic / Data file	Description	Data file format ¹	Number of indicators ²	Number of records
WPP2008_DB03_Population_Quinquennial.csv	Database format with sex and age in rows.	CSV	1	>2,700,000
WPP2008_DB03_Population_By_Sex_Quinquennial.csv	Database format with sex in column and age in row.	CSV	3	>900,000
WPP2008_DB03_Population_By_Age_Quinquennial.csv	Database format with sex in row and age from 0 to 100+ in column.	CSV	22	>135,000
DB04. Population by age and sex, annual	Population by age group and sex, by major area, region and country, annually for 1950-2050 (estimates and Medium variant, and 4 AIDS mortality scenarios). Data only for 1980-2050 for AIDS scenarios.			
WPP2008_DB04_Population_Annual.csv	Database format with sex and age in rows.	CSV	1	>2,700,000
WPP2008_DB04_Population_By_Sex_Annual.csv	Database format with sex in column and age in row.	CSV	3	>900,000
WPP2008_DB04_Population_By_Age_Annual.csv	Database format with sex in row and age from 0 to 100+ in column.	CSV	22	>135,000
DB05. Mortality indicators by age and sex	Total deaths by age group and sex, by major area, region and country, for estimates and all 11 projection variants or scenarios, 1995-2050. Data only for 1980-2050 for AIDS scenarios.			
WPP2008_DB05_Deaths.csv	Database format with sex and age in rows.	CSV	1	>1,300,000
WPP2008_DB05_Deaths_By_Sex.csv	Database format with sex in column and age in row.	CSV	3	>450,000
WPP2008_DB05_Deaths_By_Age.csv	Database format with sex in row and age from 0 to 100+ in column.	CSV	22	>80,000
	Life Table (by sex and both sexes combined) by major area, region and country, 1995-2050 (estimates, medium variant with AIDS mortality and No-AIDS mortality scenarios).			
WPP2008_DB05_Life_Table.csv	Life table survivors, $l(x)$, and life expectancy at exact age, $e(x)$, by sex and both sexes combined. Database format with sex and age in rows.	CSV	2	>240,000
WPP2008_DB05_Life_Table_lx_By_Age.csv	Life table survivors, $l(x)$, at exact age (x) by sex and both sexes combined. Database format with sex in row and age from 0 to 85 in column.	CSV	18	>11,000
WPP2008_DB05_Life_Table_ex_By_Age.csv	Life expectancy at exact age, $e(x)$, by sex and both sexes combined. Database format with sex in row and age from 0 to 100 in column.	CSV	21	>11,000
DB06. Fertility indicators by age	Births by age group of mother and age-specific fertility rates, by major area, region and country, for estimates and all 9 projection variants or scenarios, 1995-2050. Data only for 1980-2050 for AIDS scenarios.			
WPP2008_DB06_Fertility_Indicators.csv	Database format with indicators in column and age groups in row.	CSV	2	>180,000
WPP2008_DB06_Fertility_Indicators_By_Age.csv	Database format with indicators by age group in column.	CSV	14	>25,000
DB15. Interpolated annual indicators				
WPP2008_SUP_F1_Annual_Demographic_Indicators.csv	Interpolated demographic indicators by major area, region and country, annually for 1950-2050 (estimates and all 9 projection variants or scenarios).	CSV	26	>250,00
WPP2008_SUP_F2_Annual_Population_Indicators.csv	Interpolated total population by broad age group and by sex, and urban population, by major area, region and country, annually for 1950-2050 (estimates and medium variant, and 2 AIDS mortality scenarios).	CSV	169	>45,000
WPP2008_SUP_F3_Annual_Population_Indicators_Percentage.csv	Percentage of total population by broad age group by sex, dependency ratios (total, child, old-age) for different age groups and by sex, percentage urban and population density, by major area,	CSV	183	>45,000
